

## KD / K8

**How it works** Eliminates the electrical noise caused by switching of the coils. Mounting with double-sided tape.

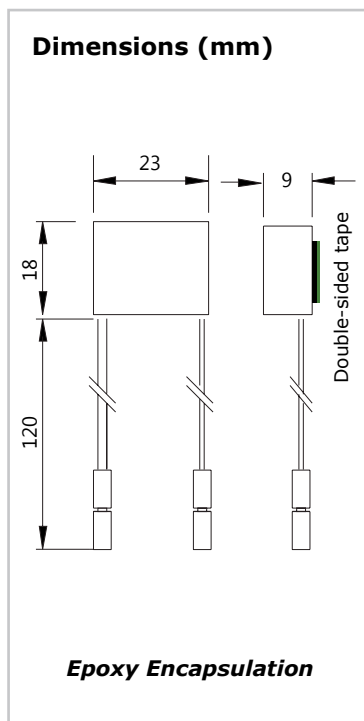

- Typical applications**
- Electrical panels for automation with PLC&CNC;
  - Machines retrofitting;
  - Coils, mini contactors, auxiliary contactors, relay switching and valves;
  - Eliminate intermittent faults in machines.

### KD (Direct Current)

For coils with power **< 80W**  
Voltage **0 ... 24Vdc**  
Weigth **6g**

### K8 (Alternating Current)

For coils with power **< 8VA**  
Voltage **0 ... 220Vac**  
Weigth **7g**

### Mounting
